

Public Notice on Commingled Trash & Recyclables

Is it acceptable for the garbage company to mix recyclable materials with regular trash?

The only times this is permissible are as follows:

- ❖ If it is a dual truck where garbage goes into one section and recyclables go into another section.
- ❖ If residents have put something in the recycling which is not recyclable, causing the recycling to become garbage. One small item could render the entire recycling container garbage.

If residents see this happen, they should contact the Borough with the following information so the Borough can contact the hauler on this issue:

- ❖ Date, time and location of incident
- ❖ Resident name and contact information
